Subject index of volume 9

Adaptive algorithms 109
AND-request 77
Asynchronous communication 173
Asynchronous networks 147
At-most-once message delivery 109
Authentication 131

Boyer Moore logic 21
Broadcast network 157
Byzantine Agreement 95
Byzantine agreement 147

Causal memory 38
Causal order 173
Causality relation 173
Communication 173
Communication algorithms 109
Communication protocols 157
Concurrency 193
Consensus 21
Consistency condition 119
Contention 193
Correctness 21
Counting networks 193

Data structures 193
Deadlocks 77
Distributed algorithms 147
Distributed computation 173
Distributed computing 95
Distributed shared memory 38, 119
Distributed system 173
Distributed termination detection 173

Fast mutual exclusion 51
Fault tolerance 95
Fault-tolerant computing 147
Faulty channels 147
Finite-state machines 157
Finite-state systems 61
Formal methods 61

Grain of atomicity 21
Greedy routing 3

Hot potato (deflection) routing 3
Hybrid consistency 119

Invariant 21

Key distribution 131

Leader election 157
Linearizability 193
Linearizable 21
Local spinning 51
Lower bound 131

Mechanical verification 21
Memory consistency 38
Memory management 21
Mesh architecture 3
Message complexity 157
Message passing 173
Mutual exclusion 51

Optimal protocol 131

Packet 3
Process algebra 61
Protocol design, specification, and verification 157
Protocol metrics 131

Read, write atomicity 51
Reconstructed traversal 95
Resources 77

Scalability 51
Sequential consistency 38
Shared data object 21
Synchronization operations 119
Synchronization primitives 51
Synchronized clocks 109
Synchronous communication 173

Temporal logic 157
Time complexity 51

Verification algorithms 61

Wait-free 21
